ANNUAL REPORT

— OF THE —

SCHOOL BOARD.

Schools have been maintained in the five original districts in the town twenty-five weeks during the past year. A glance at our financial statement will show why there were not thirty weeks of schooling, as there should have been. The teachers were paid the lowest prices for which competent persons could be hired, two receiving \$5.00 a week, one \$6.50, one \$7.50, and \$8.00, a week, from which they paid their board. Every teacher gave perfect satisfaction as far as your board could learn, and frequent inquiries were made.

Parents, through their children, have better opportunities for knowing how a teacher is conducting a school than the school-board, and if they learn of things to criticise, they should inform the school-board, that faults may be remedied. At the prices we can afford to pay teachers, Normal school graduates cannot be obtained. It would be better if a less number of schools could be maintained in town, and the scholars better grouped, but the "Tin Corner" and "Sanborn Road" districts are so far from the others that it has not seemed practicable to discontinue the schools there, even though the number of pupils is small.

There has been a large amount of sickness among the scholars, especially at East Tilton. This has rendered the schools less beneficial, but was unavoidable. There have been 84 different pupils registered, and an average daily attendance of 56. Of the pupils six were under six years of age and none over six-

teen years. The infant class has been by far, the largest. Like all country schools the number of classes almost equals the number of scholars. A step has been taken toward better classification, with good results. Scholars moving in and out of the districts, non-attendance from sickness and other causes, and the non-prolific tendencies of modern families will always keep our country schools from reaching the perfection of graded schools. Perfect classification is impossible, for the needs of the scholar attending ten weeks, when not required on the farm, must be attended to as well as of the scholar attending the whole year. This, of course, necessitates more classes.

Having heard no fault found with the schools, but, on the other hand, having heard words of commendation for the teachers and scholars, and having made twenty-seven visits to the schools, and constant inquiries of parents, we are in position to report a successful school year. We ^{recommend}~~recommmend~~ that at least four hundred dollars be raised for the coming year in addition to the amount raised by law. It will require one hundred and fifty dollars to shingle and otherwise repair the school-houses. There should be money enough to have thirty weeks of school during the year.

ANNUAL * REPORT

— OF THE —

BOARD OF EDUCATION,

UNION DISTRICT, TILON AND NORTHFIELD.

The success of a school depends on the earnest and harmonious efforts of three persons—teacher, pupil and parent. We feel able to say that the schools under our charge during the past year have been very successful for the reason that the teachers have been faithful; the pupils have been interested in their work and we find by careful inspection and examinations, have made excellent progress; and we are most happy to say that the parents have begun to realize the importance of their influence, and have shown more interest than usual by frequent visits to the school-room, and in upholding the teachers in their work. For the amount of money at command of the Board better and longer schools have been kept than could be reasonably expected, all of our teachers being capable of obtaining higher salaries elsewhere.

But few changes in the course of study in the several departments have been necessary, and those have been chiefly in carrying out more completely the Normal method in the two lower grades. This method of teaching is so far in advance of the old style that the advantage of the change needs no comment. These schools have been under the charge of Miss Nettie McQuesten and Miss Marion E. Lyford, both of whom have taught in the schools previously and given great satisfaction. We cannot ask for more competent teachers. Miss Annie O. Drake, also an old teacher here, has taught the Intermediate School and

has kept up her usual good record. Miss Drake has done good work but we believe it would be for the interest of the school to secure a Normal teacher for the coming year. For Principal we secured the services of Mr. E. K. Smith, a teacher of experience. Mr. Smith has worked hard and created an interest for knowledge among his scholars, and has looked well to the moral tone of the whole school. The result of the year's work proves him to be a thorough and efficient teacher.

The record of daily absences is too large. Any unusual occurrence in town draws many of the scholars to the street rather than to school. Upon investigation we find that, in a majority of cases permission to be absent was given by the parents. Now this is not right. It breaks up the regular order of study, interferes with the duties of the teachers, and impedes the progress of those who do attend. The School Board is always generous in granting holidays, therefore we ask the parents to consider the matter and see that their children are never absent without good reason.

The school building is in a very poor condition. Improperly built on a poor foundation and a still poorer soil, it is almost impossible to keep it in repair. The foul gases arising from the low ground permeates through the ill constructed building, which having no means of ventilation is a serious menace to the health of the scholars. As the building can never be made suitable for school purposes, we advise that a proper sum of money be appropriated each year to keep the building in ordinary repair until the district shall decide to erect a substantial building with modern improvements. The number of scholars, also, is increasing so rapidly that we shall soon need more room for their accommodation. For the past year the average number has been forty to a department, which is more than any teacher can attend to with profit.

With the advice of State Supt. Patterson, we ask the voters of the district to consider the method of electing the school board and see if it would not be advisable to adopt the usual system of electing for three years, choosing one new member each year. By this method a majority of the board hold over, and are thus able to make arrangements in advance for retaining old teachers

or selecting new ones, as well as doing many other minor duties for the interest of the schools. Our school year, beginning as it does in March, the worst season of the year for procuring the best teachers, and with but a few weeks before the opening of the Spring term, makes the present system of choosing all three members each year a very poor one, and does not give the new board sufficient time to do justice either to themselves or to the school.

Money was appropriated for the purpose of introducing water into the school building from the Aqueduct system. This has been done in a thorough manner, and will prove a great convenience.
